

Building and Engineering

About the opportunity

Our Building and Engineering team consists of engineering and building surveying professionals who are at the forefront of our developing City.

You will be exposed to a variety of Council's businesses, having direct contact with a multitude of teams throughout the organisation. You will be mentored by professionals within the industry, and encouraged by a large support network in our Planning and Development directorate.

This role will be heavily involved in the administrative component of development plans, including creating files, liaising with clients, data entry and validation.

This is a front facing, customer service focussed role within the organisation, dealing with key internal and external stakeholders.

Connect - Create - Celebrate
